Edit inbound rules

Inbound rules control the incoming traffic that's allowed to reach the instance.

Inbound rules

Security group rule ID	Type	Protocol	Port range	Source	Description - optional	
sg-r-0a05c7d3f2d659b92	SSH	TCP	22	Cust... 0.0.0.0/0		Delete
sg-r-00956191191b304fc	HTTP	TCP	80	Cust... 0.0.0.0/0	http	Delete

Add rule

Rules with source of 0.0.0.0/0 or ::/0 allow all IP addresses to access your instance. We recommend setting security group rules to allow access from known IP addresses only.

About us

Petco is a category-defining health and wellness company focused on improving the lives of pets, pet parents and our own Petco partners. Since our founding in 1965, we've been trailblazing new standards in pet care, delivering comprehensive wellness solutions through our products and services, and creating communities that deepen the pet-parent bond.

We employ more than 29,000 partners nationwide and operate more than 1,500 Petco locations across the U.S., Mexico and Puerto Rico — including a growing network of more than 200 in-store veterinary hospitals — and offer a complete online resource for pet health and wellness at petco.com and on the Petco app.

In tandem with Petco Love, an independent nonprofit organization, we have helped find homes for more than 7 million animals through in-store adoption events.
